Progression of knowledge in science

EYFS Our environment; Materials around us; Growth and differences between plants and animals; Ourselves and others	**Year 1** Plants; Animals, including humans; Everyday materials; Seasonal changes	**Year 2** Living Things and their Habitats; Plants Animals including humans; Uses of everyday materials	**Year 3** Plants; Animals including humans; Rocks; Light; Forces and Magnets
Our environment • Examining photographs and simple maps and visiting local places • Expressing opinions on natural and built environments • Using words which help to express opinions, e.g. 'busy', 'quiet' and 'pollution'. **Materials around us** • Noticing and discussing patterns around e.g. rubbings from grates, covers, or bricks • Recording findings by drawing, writing and making models **Growth: plants and animals; Differences: plants and animals** • Examining change over time, e.g. growing plants • Creating simple maps and plans, paintings, drawings and models of observations of known and imaginary landscapes. • Designing practical, attractive environments, e.g. taking care of the flowerbeds **Ourselves and others** • Sharing feelings and talking about experiences • Observing the ways in which cultures and beliefs are similar, sharing and discussing practices, resources, celebrations and experiences. • Sharing and celebrating a range of practices and special events.	**Plants** • Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees • Identify and describe the basic structure of a variety of common flowering plants, including trees. **Animals, including humans** • Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals • Identify and name a variety of common animals that are carnivores, herbivores and omnivores • Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) • Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense. **Everyday materials** • Distinguish between an object and the material from which it is made • Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock • Describe the simple physical properties of a variety of everyday materials • Compare and group together a variety of everyday materials on the basis of their simple physical properties. **Seasonal changes** • Observe changes across the four seasons • Observe and describe weather associated with the seasons and how day length varies.	**Living Things and their Habitats** • Explore and compare the differences between things that are living, dead, and things that have never been alive • Identify that most living things live in habitats to which they are suited • Describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other • Identify and name a variety of plants and animals in their habitats, including micro-habitats • Describe how animals obtain their food from plants and other animals • Understand a simple food chain, and identify and name different sources of food. **Plants** • Observe and describe how seeds and bulbs grow into mature plants • Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy. **Animals including humans** • Notice that animals, including humans, have offspring which grow into adults • Find out about and describe the basic needs of animals, including humans, for survival (water, food and air) • Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene. **Uses of everyday materials** • Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses • Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.	**Plants** • Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers • Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant • Investigate the way in which water is transported within plants • Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal. • Know that plants make their own food **Animals including humans** • Identify that animals, including humans, need the right types and amount of nutrition, and that they ah2 cannot make their own food; they get nutrition from what they eat • Identify that humans and some animals have skeletons and muscles for support, protection and movement. **Rocks** • Compare and group together different kinds of rocks on the basis of appearance and simple physical properties • Describe in simple terms how fossils are formed when things that have lived are trapped within rock • Recognise that soils are made from rocks and organic matter. **Light** • Recognise that they need light in order to see things and that dark is the absence of light • Notice that light is reflected from surfaces • Recognise that light from the sun can be dangerous and that there are ways to protect their eyes • Recognise that shadows are formed when the light from a light source is blocked by a solid object • Find patterns in the way that the sizes of shadows change. **Forces and Magnets** • Compare how things move on different surfaces • Notice that some forces need contact between two objects, but magnetic forces can act at a distance • Observe how magnets attract or repel each other and attract some materials and not others • Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials • Describe magnets as having two poles • Predict whether two magnets will attract or repel each other, depending on which poles are facing.

Year 4 Living things and their Habitats Animals including humans; States of matter; Sound; Electricity	**Year 5** Living things and their Habitats; Animals, including Humans; Properties and changes of materials; Earth and space; Forces	**Year 6** Living things and their Habitats; Animals, including Humans; Evolution and Inheritance; Electricity
Living things and their Habitats • Recognise that living things can be grouped in a variety of ways • Explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment • Recognise that environments can change and that this can sometimes pose dangers to living things. **Animals including humans** • Describe the simple functions of the basic parts of the digestive system in humans • Identify the different types of teeth in humans and their simple functions • Construct and interpret a variety of food chains, identifying producers, predators and prey. **States of matter** • Explore a variety of everyday materials and develop simple descriptions of the states of matter • Compare and group materials together, according to whether they are solids, liquids or gases • Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) • Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature. **Sound** • Identify how sounds are made, associating some of them with something vibrating • Recognise that vibrations from sounds travel through a medium to the ear • Find patterns between the pitch of a sound and features of the object that produced it • Find patterns between the volume of a sound and the strength of the vibrations that produced it • Recognise that sounds get fainter as the distance from the sound source increases. **Electricity** • Identify common appliances that run on electricity • Construct a simple series circuit, identifying/naming its basic parts, including cell, wire, bulb, switch and buzzer • Use their circuits to create simple devices • Draw the circuit as a pictorial representation (not necessarily using conventional circuit symbols) • About precautions for working safely with electricity. • Identify whether or not a lamp will light in a simple series circuit/ • Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit • Recognise some common conductors and insulators, and associate metals with being good conductors.	**Living things and their Habitats** • Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird • Describe the life process of reproduction in some plants and animals. • Raise questions about their local environment throughout the year. • Find out about the work of naturalists and animal behaviourists, for example, David Attenborough and Jane Goodall. • Find out about different types of reproduction, including sexual and asexual reproduction in plants, and sexual reproduction in animals. **Animals, including Humans** • Describe the changes as humans develop to old age. • Draw a timeline to indicate stages in the growth and development of humans. • Learn about the changes experienced in puberty. **Properties and changes of materials** • Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets • Know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution • Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating • Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic • Demonstrate that dissolving, mixing and changes of state are reversible changes • Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda. • Explore reversible changes, including, evaporating, filtering, sieving, melting and dissolving, recognising that melting and dissolving are different processes. • Explore changes that are difficult to reverse, for example, burning, rusting and other reactions, for example, vinegar with bicarbonate of soda. **Earth and space** • Describe the movement of the Earth, and other planets, relative to the sun in the solar system • Describe the movement of the Moon relative to the Earth • Describe the Sun, Earth and Moon as approximately spherical bodies • Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky. • Learn that the Sun is a star at the centre of our solar system and that it has eight planets: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune (Pluto was reclassified as a 'dwarf planet' in 2006). • Understand that a moon is a celestial body that orbits a planet (Earth has one moon; Jupiter has four large moons and numerous smaller ones). **Forces** • Explain that unsupported objects fall towards the Earth because of	**Living things and their Habitats** • Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals • Give reasons for classifying plants and animals based on specific characteristics. • Know that broad groupings, such as micro-organisms, plants and animals can be subdivided. • Should classify animals into commonly found invertebrates (such as insects, spiders, snails, worms) and vertebrates (fish, amphibians, reptiles, birds and mammals). • Find out about significance of the work of scientists such as Carl Linnaeus, a pioneer of classification. **Animals, including Humans** • Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood • Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function • Describe the ways in which nutrients and water are transported within animals, including humans. • Explore questions to understand how the circulatory system enables the body to function. • Learn how to keep their bodies healthy and how their bodies might be damaged – including how some drugs and other substances can be harmful to the human body. • Explore the work of scientists and scientific research about the relationship between diet, exercise, • Drugs, lifestyle and health. **Evolution and Inheritance** • Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago • Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents • Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution. • Be introduced to the idea that characteristics are passed from parents to their offspring, i.e. Different breeds of dogs, and what happens when, for example, Labradors are crossed with Poodles. • Appreciate that variation in offspring over time can make animals more or less able to survive in particular environments, for example, by exploring how giraffes' necks got longer. • Find out about the work of palaeontologists such as Mary Anning and about how Charles Darwin and Alfred Wallace developed their ideas on evolution. **Light** • Recognise that light appears to travel in straight lines • Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye • Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes • Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.

	the force of gravity acting between the Earth and the falling object • Identify the effects of air resistance, water resistance and friction, that act between moving surfaces • Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect. • Explore the effects of air resistance by observing how different objects such as parachutes and sycamore seeds fall. • Explore the effects of friction on movement and find out how it slows or stops moving objects. • Find out how scientists, for example, Galileo Galilei and Isaac Newton helped to develop the theory of gravitation.	• Look at a range of phenomena including rainbows, colours on soap bubbles, objects looking bent in water and coloured filters. **Electricity** • Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit • Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches • Use recognised symbols when representing a simple circuit in a diagram. • Construct simple series circuits, to help them to answer questions about what happens when they try different components, for example, switches, bulbs, buzzers and motors. • Learn how to represent a simple circuit in a diagram using recognised symbols.
